Mounting of graphics

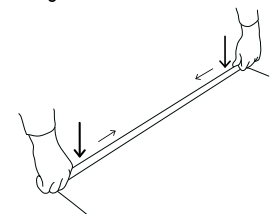

Open and insert the graphics into the slot of the top profile.
Note that the two profiles (top and bottom) looks exactly the same.

Secure it by closing the profile. Make sure to apply enough pressure to assure secure mounting.

Do the same thing with the bottom profile. Open the profile, insert the graphics and secure it by closing.

When the two profiles are in place the graphics is ready to be mounted on the system. For further instructions look at "set up instruction".
