## Mounting of graphics

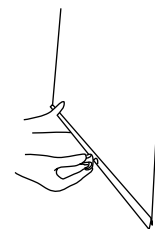

Open and insert the graphics into the slot of the top profile. Note that the two profiles (top and bottom) look exactly the same.

Secure it by closing the profile. Make sure to apply enough pressure to assure secure mounting.

Do the same thing with the bottom profile. Open the profile, insert the graphics and secure it by closing.

As a last step, before mounting the graphics on to the system, attach the little plastic connector to the slot on the bottom profile.
